

# ILAB TECHNICAL COOPERATION PROJECT SUMMARY

---

<b>PROJECT TITLE</b>	<b>ELIMINATE EXPLOITIVE CHILD LABOR THROUGH EDUCATION AND ECONOMIC DEVELOPMENT (EXCEED)</b>
<b>ILAB PROGRAM</b>	International Child Labor Technical Assistance
<b>REGION/COUNTRY</b>	ASIA/Indonesia
<b>PROJECT DURATION</b>	September 30, 2009 – September 30, 2013
<b>FISCAL YEAR &amp; FUNDING LEVEL</b>	FY2009: \$5,500,000
<b>PROBLEM TO BE ADDRESSED</b>	Indonesia has one of the largest populations of children in the world, and estimates suggest that millions of them are involved in exploitive child labor. The majority of work by children in Indonesia occurs in rural areas, where children work in plantation agriculture. Children also work as domestic servants and are involved in commercial sexual exploitation. Trafficking of women and children continues to be a major problem. The Government of Indonesia is implementing a 20-year National Action Plan (NAP) to Eliminate the Worst Forms of Child Labor, and the law prohibits children from engaging in any work that can harm their health, safety or morals.
<b>TARGETS</b>	<p>The project targets 6,000 children for withdrawal and 4,800 children for prevention from exploitive work as domestic servants, on plantations (specifically palm oil), and as street children (particularly girls), and from being trafficked for commercial sexual exploitation or forced labor.</p> <p>The project will target the following provinces and municipalities: West Java (Bandung); Central Java (Semarang, Yogya); East Java (Surabaya); South Sumatra (Lampung); and West Kalimantan (Pontianak, Singkawang, Sambas, Sanggau).</p>
<b>PROJECT OBJECTIVES</b>	<p>The goal of the project is to reduce the overall number of children involved in and at risk of engaging in exploitive child labor. Specific objectives include:</p> <ul style="list-style-type: none"><li>• Providing educational and social services by sector to withdraw children from exploitive child labor or prevent children from entering such labor;</li><li>• Improving the enabling environment to combat child labor by increasing the capacity of stakeholders (particularly at the local level) to implement the NAP and ensure sustainability;</li><li>• Increasing awareness of the worst forms of child labor and the importance of education for all children; and</li><li>• Conducting research on child labor to better understand its root causes.</li></ul>

## SUMMARY OF ACTIVITIES

- Provision of educational services to children, including a mix of formal education, non-formal education, skills training, and the creation of farm schools in West Kalimantan;
- Establishment of 5 community support and reintegration centers to provide individualized care for children being withdrawn from exploitive labor who are in need of such care;
- Linkage with apprenticeship and internship programs to provide alternate livelihood options for at least 500 withdrawn children;
- Creation of a web-based data entry system (FieldLink Indonesia) to track, analyze, document and evaluate all data on program beneficiaries;
- Formation of working groups to address child labor at the national and local levels;
- Conduct of a national survey and two small-scale studies on children working in plantation agriculture and children engaged in CSEC; and
- Execution of public campaigns to raise awareness on child labor issues and the importance of education.
- As of March 31, 2011, 275 children have been withdrawn from the worst forms of child labor.
